Distance Traveled
Prevent extra vehicle use

Sudden Brakes
Prevent distracted driving and speeding

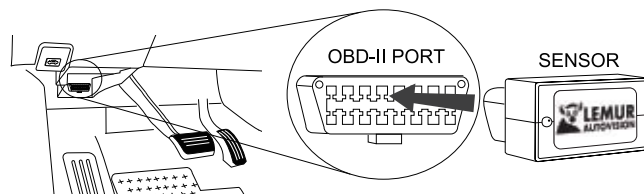

Each year there are far too many teen drivers involved in fatal driving accidents. Most of these accidents are preventable. Unsupervised teen drivers are far more likely to be in an accident than an experienced driver. The good news - when supervised, new drivers are only as likely as experienced drivers to be in an accident.

The Safe Driving Monitor™ is a new product designed to provide driving behavior feedback and encourage open information and discussion between parents and teen drivers. This is not a GPS unit – this is not a “spy” product.

The Safe Driving Monitor™ encourages more attentive, aware, cautious and safe on-the-road driving habits.

Vehicle Compatibility

All cars and light trucks manufactured for 1996 and later.

- Wireless Driving Feedback
- View in Imperial and Metric units
- Tamperproof and PIN protected
